50X1

Dear [redacted]

50X1

Various changes have been made in the equipment layout for the control station which alter somewhat the layout originally presented on the block diagram submitted in February 1955. The present arrangement is shown on the block diagram of the control station which is dated 4 November 1955. Three copies of this diagram are enclosed.

The master control unit comprising the several units as shown on the block diagram is mounted on a single chassis. An overall schematic of this unit is enclosed in triplicate.

Detailed circuits for the gate control, the transponder and control for use at the outstations have been developed. Three copies of each of these circuits are enclosed. These are all preliminary, subject to revision, and are dated 4 November 1955. In accordance with the directions as received from [redacted] on 14 November 1955, none of the drawings enclosed need be classified except the block diagram of the control station. Additional drawings will be sent as they become available.
